

## HALO Announces Industry's First, 1x4 Ultra Low Profile Fastjacks™

Press Release: Munich Germany, November 11TH, 2008

HALO is pleased to announce a new series of "Ultra Low Profile" 1x4 FastJacks™. HALO introduced the industry's lowest profile integrated single port connector for Mini PCI applications in 2005. This new family of 1x4 connectors expands on our proven single port technology. Maintaining a maximum seated height of 9.5mm, this series is ideal for high density AMC 2.0 and PMC mezzanine applications. Available in 10BASE-T, 10/100, 10/100 w/POE and Gigabit circuits.

This proprietary family of "Ultra Low Profile" FastJacks™ is UL/EN60950 recognized and meets the IEEE802.3

standards for high performance Ethernet applications. Optional LEDs are available to solve the existing space problems associated with high density AMC 2.0 and PMC mezzanine cards. This new series is cost effective, reducing real estate, component count, manufacturing costs and the total cost of the circuit.

Samples are available now. Production lead times are 5-8 weeks depending on the circuit requirements.

For more information, please contact your local HALO representative or distributor.

*HALO Electronics, Inc., continuing our technology leadership role by providing "Next Generation Solutions Today".*
